

GreenPeak Vacancy

GreenPeak is a fabless semiconductor company offering innovative ultra low power wireless and battery-free data communication controller chips for consumer electronics and wireless sense and control applications for remote controls, home automation and security.

GreenPeak driven ultra low power networks bring true maintenance-free operation

→ GreenPeak Technologies brings **wireless and green** solutions for control networks with **high reliability** and **standard compliance** and unique features that make it **robust to interference**.

To further strengthen our team, we currently have a vacancy for a

Mixed Signal IC Test Engineer

Your profile

- ▶ We are looking for a team player with a broad interest in different areas of electrical engineering to develop hardware and software for (semi-) automated lab test setups to validate and characterize GreenPeak's current and future wireless products. You will work closely together with the IC design team to develop new test methods.
- ▶ You hold a bachelor or masters degree in electrical engineering or physics, and are proficient in technical reporting.
- ▶ You must have experience in PCB design/layout using CAD tools and test software development. Experience with RF board layout and lab view programming is a pre.
- ▶ You should be familiar with the use of modern test equipment like network analyzers, signal generators and digital oscilloscopes.

Our offering

- ▶ Early-adopter job in growing high-tech company: you really make the difference
- ▶ Extremely dynamic working environment: new ideas are born and implemented as fast as you can manage
- ▶ A job where you work on enabling technology for future wireless systems: our products are applied in a world wide market.

At GreenPeak, people make the real difference!

If you like to join our young and dynamic team and if you are convinced you will be a real asset to GreenPeak, we would be delighted to receive your CV.
